

A background image showing a worker in a grey long-sleeved shirt and blue gloves handling a large brown paper bag on a factory floor. The scene is overlaid with a blue gradient.

# Chem One Expands Capabilities with New Repackaging Line

To better serve our customers and strengthen supply reliability, Chem One is installing a new dry powder repackaging line at their facility. This investment expands the ability to deliver high-quality, professionally packaged products with greater efficiency, consistency, and flexibility.

Designed for industrial chemical distribution and manufacturing partners, the new line enhances Chem One's ability to support repackaging requirements while maintaining the high safety and quality standards customers expect.

## Quality, Compliance & Industry Standards

---

Operations are supported by recognized industry certifications and regulatory compliance, including:

- **Chem One management system is certified** to ISO 9001:2015 for quality, ISO 14001:2015 certification for environmental management, and has ISO 45001:2018 certification highlighting the commitment to worker safety and risk
- **Member of the Alliance for Chemical Distribution (ACD)**, demonstrating commitment to Responsible Distribution and industry best practices
- **The Chem One facility also holds an EPA Establishment No.**

These standards reinforce our focus on safety, traceability, and product integrity throughout the repackaging process.

## Advanced Dry Packaging Capabilities

---

The new automated system is designed specifically for **dry inorganic powders and salts**, delivering precise, efficient packaging with repeatable accuracy. Capabilities include:

- **Automated bagging scale** with  $\pm 2$  oz accuracy for consistent fill weights
- Packaging formats:
  - **50 lb bags, 25 kg bags & Super Sacks**
- **Heat-sealed plastic bags** available in both **UN-certified and non-UN certified configurations**

These capabilities support a range of customer distribution needs while maintaining product protection and packaging integrity.

## Private Labeling Services

---

Chem One also offers **private labeling solutions** to support customer branding and regulatory compliance, including:

- **GHS-compliant labeling systems**
- **High-quality printed labels**

## Materials We Repackage

---

Chem One's repackaging services are designed for:

- **Non-hazardous materials**
- **Non-reactive products**
- **Stable inorganic powders and salts**

Each product is handled using controlled processes to maintain safety, product quality, and consistency.

## Supporting The Supply Chain

This new repackaging capability reflects Chem One's continued commitment to helping customers streamline logistics, reduce handling complexity, and ensure reliable product delivery.

Whether supporting distribution programs, custom packaging requirements, or private label initiatives, Chem One is investing in the infrastructure needed to support your growth.
